

2. 수목 병리학은 어떤 내용인가 ?

Tree Pathology

A short Introduction

Edited by: William H. Smith

ISBN: 978-0-12-652650-9

Contents

Part I Abiotic Stress Agents

1 Introduction

2 Moisture Extremes

I. Insufficient Water-Drought

II. Excess Water-Flooding

3 Temperature Extremes

I. High Temperature-Heat Injury

II. Low Temperature-Cold Injury

4 Other Climatic Stress Agents

I. Wind II. Snow

III. Ice IV. Lightning

5 Mineral Deficiencies and Excesses

**I. Symptoms and Metabolic Disturbances
Associated with Nutrient Deficiencies**

**II. Pathological Significance of Nutrient
Excess**

6 Air Pollution

**I. Nonphotochemically Produced
Gaseous Pollutants**

**II. Photochemically Produced
Gaseous Pollutants**

III. Air Pollution in Perspective

7 Miscellaneous Abiotic and Large Animal Stresses

I. Radiation

II. Excess Salt

III. Pesticides

IV. Underground Gas

V. Large Animal Stress

Part II Biotic Stress Agents

8 Nematodes

- I. Classification**
- II. Morphology and Anatomy**
- III. Physiology**
- IV. Ecology**
- V. Nematodes and Tree Pathology**

9 Specific Nematodes, Tree Health, and Control

- I. Specific Nematode Disease Agents**
- II. Nematode Control**

10 Viruses

- I. Virus Characteristics**
- II. Host-Virus Relationship**
- III. Abnormal Physiology**
 - Induced by Viruses**
- IV. Virus Transmission**
- V. Viruses as Pathogens**

11 Specific Forest Tree Virus Disorders

- I. Gymnosperms**
- II. Angiosperms**

12 Bacteria

- I. Classification**
- II. Anatomy and Physiology**
- III. Ecology**

13 Specific Bacteria and Tree Disease

- I. Bacteria as Direct Disease Agents**
- II. Mechanism of Crown Gall**
 - Formation**
- III. Wetwood**
- IV. Indirect Bacterial Effects**

14 Fungi: Introduction and Classification

15 Fungi: Physiology and Ecology

16 Fungi That Cause Decay and Discoloration

I. Wood Anatomy

II. Wood as a Microbial Substrate

III. Types of Wood Decay

IV. Ecology of Wood Decay Fungi

V. Managerial and Silvicultural Aspects of Wood Decay

VI. Stains

17 Fungi That Cause Various Symptoms (Rust Fungi)

I. Spore Types of Rust Fungi

II. Generalized Life Cycle of a Macrocytic Rust Fungus

III. Rust Diseases of Forest Trees

IV. Control of Rust Diseases

18 Fungi That Cause Canker and Foliar Symptoms

19 Fungi That Cause Vascular Discoloration and Wilting

I. Examples of Important Angiosperm Wilt Diseases

II. Mechanism of Vascular Disease

20 Fungi That Cause Root Discoloration, Necrosis, Rotting, and Other Root Symptoms

I. Root Environment

II. Specific Root Diseases

21 Deleterious Higher Plants

I. Parasitic Angiosperms

II. Nonparasitic Angiosperms

Part III Special Topics

22 Climate and Tree Disease

- I. Microclimate and Tree Disease**
- II. Macroclimate and Tree Disease**

23 Epidemiology

- I. Inoculum Potential**
- II. Epidemiology**
- III. Epidemiological Considerations in Forest Tree Culture**

Part IV Disease Control

24 Exclusion

- I. General Concepts of Disease Control**
- II. Exclusion**
- III. Summary**

25 Eradication

- I. Destruction of Diseased Individuals**
- II. Removal of Alternate or Weed Hosts**
- III. Therapy**
- IV. Disinfestation of the Environment**
- V. Summary**

26 Protection

- I. Environmental Modification**
- II. Silvicultural Practices**
- III. Biological Protection**
- IV. Chemical Protection**
- V. Summary**

27 Resistance

- I. Mechanisms of Resistance**
- II. Control through Disease Resistance**
- III. Summary**
